

Parallel Works ACTIVATE

High Security Platform

For Secure, Hybrid, Multi-Cloud Computing

What is Parallel Works' ACTIVATE HSP Platform?

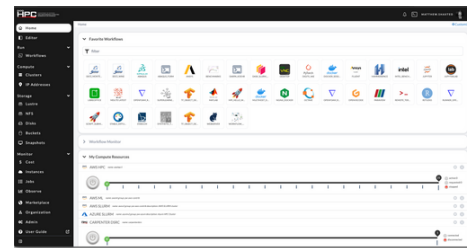

Parallel Works ACTIVATE High Security Platform (HSP) is the first hybrid, multi-cloud platform purpose-built for US national security workloads. ACTIVATE HSP transforms secure computing by offering a preauthorized, mission-ready control plane for managing cloud, on-prem, and edge resources. Parallel Works received its Authorization to Operate (ATO) at the U.S. Department of Defense (DoD) Impact Level 5 (IL-5), granted by the High Performance Computing Modernization Program in August 2025.

Technical Features

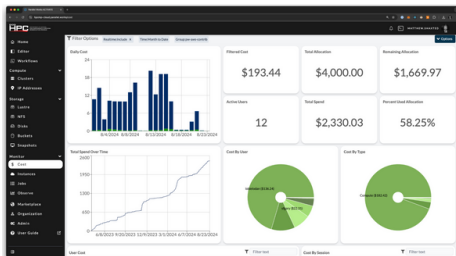

Authorized IMPACT LEVEL 5 (IL-5) Boundary

Manage different on-premise high-performance computing clusters easily and connect across resources in one interface.

Unified Interface

This platform meets stringent security standards for government data. Save years and millions of dollars on contractors and audits with our security package.

Control Cloud Costs and Budget Enforcement

Enforce cloud project budgets at near real-time resolutions across cloud service providers. Near real-time budget controls to optimize resource use and prevent overspending.

Google Cloud

Burst Across Hybrid Clouds and DSRCs

Burst on-demand to 100,000+ cores across AWS (Azure and Google Cloud coming soon) and the Defense Supercomputing Resource Centers (DSRCs), reducing compute delays from weeks to minutes.

Parallel Works ACTIVATE

High Security Platform

For Secure, Hybrid, Multi-Cloud Computing

Key Benefits

ENHANCED DATA SECURITY	Impact-Level 5 (IL-5) compliance, providing data isolation and end-to-end protection for mission-critical operations
QUICK DEPLOYMENT & REDUCED QUEUE TIMES	Government agencies can run workflows within days rather than months. Get immediate access to scalable cloud resources to eliminate delays common with traditional HPC centers
UNIFIED COMPUTE RESOURCE MANAGEMENT	Consolidate on-premises, cloud, and hybrid environments for streamlined provisioning, task scheduling, and operational efficiency
SAFE AND SECURE SECURITY PROVISIONS	Single sign-on to connect to the DREN and NIPRnet compute resources. Create and manage clusters on demand without compromising security or performance
MAINTENANCE & MONITORING	Parallel Works team will closely monitor for suspicious activity and perform necessary lockdown modes to escalate & restore secured data

Get Started with ACTIVATE HSP

Parallel Works ACTIVATE HSP is available today through these two options:

Option 1 – HPCMP Path: Parallel Works ACTIVATE HSP is available today via the High Performance Computing Modernization Program (HPCMP) as a shared service on NIPRnet.

Option 2 – Standalone Path: ACTIVATE HSP is also deployable as a standalone IL5-accredited enclave, with licenses, support, and cloud spend available through Parallel Works or its channel partners. Organizations leveraging ACTIVATE HSP have an accelerated ability to get their own Authority to Operate (ATO) status at the DoD. This avoids 18-24 months of engineering, documentation, significant financial investment, and rigorous assessment.

Access Parallel Works ACTIVATE HSP today. Schedule a [live demo](#).
